Unified Vulnerability Assessment Report

Assessment ID: dfcbc458-116f-49fc-bc6e-3cf2a0846114

Target: http://127.0.0.1:8765/

Started: 2026-11-06T13:46:38.113996+00:00

Completed: 2026-11-06T13:46:38.171167+00:00

1. Executive Summary

Total observations: 19

Severity	Count
Critical	0
High	0
Medium	0
Low	16
Informational	3

2. Scope and Methodology

Authorized target: http://127.0.0.1:8765/

Scope: ThreatFlow Local Training Lab

Network: Python TCP Socket Scanner

Web: ThreatFlow Python HTTP Scanner

TLS: Python SSL module

3. Detailed Findings

TF-0002 - Missing HTTP security header: Content-Security-Policy

Asset: http://127.0.0.1:8765/

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Content-Security-Policy. Application-specific impact has not been established.

Evidence:

- /: Content-Security-Policy absent

Remediation: Evaluate and configure Content-Security-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0003 - Missing HTTP security header: X-Frame-Options

Asset: http://127.0.0.1:8765/

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Frame-Options. Application-specific impact has not been established.

Evidence:

- /: X-Frame-Options absent

Remediation: Evaluate and configure X-Frame-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0004 - Missing HTTP security header: X-Content-Type-Options

Asset: http://127.0.0.1:8765/

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Content-Type-Options. Application-specific impact has not been established.

Evidence:

- /: X-Content-Type-Options absent

Remediation: Evaluate and configure X-Content-Type-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0005 - Missing HTTP security header: Referrer-Policy

Asset: http://127.0.0.1:8765/

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Referrer-Policy. Application-specific impact has not been established.

Evidence:

- /: Referrer-Policy absent

Remediation: Evaluate and configure Referrer-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0006 - Missing HTTP security header: Content-Security-Policy

Asset: http://127.0.0.1:8765/docs

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Content-Security-Policy. Application-specific impact has not been established.

Evidence:

- /docs: Content-Security-Policy absent

Remediation: Evaluate and configure Content-Security-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0007 - Missing HTTP security header: X-Frame-Options

Asset: http://127.0.0.1:8765/docs

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Frame-Options. Application-specific impact has not been established.

Evidence:

- /docs: X-Frame-Options absent

Remediation: Evaluate and configure X-Frame-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0008 - Missing HTTP security header: X-Content-Type-Options

Asset: http://127.0.0.1:8765/docs

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Content-Type-Options. Application-specific impact has not been established.

Evidence:

- /docs: X-Content-Type-Options absent

Remediation: Evaluate and configure X-Content-Type-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0009 - Missing HTTP security header: Referrer-Policy

Asset: http://127.0.0.1:8765/docs

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Referrer-Policy. Application-specific impact has not been established.

Evidence:

- /docs: Referrer-Policy absent

Remediation: Evaluate and configure Referrer-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0011 - Missing HTTP security header: Content-Security-Policy

Asset: http://127.0.0.1:8765/robots.txt

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Content-Security-Policy. Application-specific impact has not been established.

Evidence:

- /robots.txt: Content-Security-Policy absent

Remediation: Evaluate and configure Content-Security-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0012 - Missing HTTP security header: X-Frame-Options

Asset: http://127.0.0.1:8765/robots.txt

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Frame-Options. Application-specific impact has not been established.

Evidence:

- /robots.txt: X-Frame-Options absent

Remediation: Evaluate and configure X-Frame-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0013 - Missing HTTP security header: X-Content-Type-Options

Asset: http://127.0.0.1:8765/robots.txt

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Content-Type-Options. Application-specific impact has not been established.

Evidence:

- /robots.txt: X-Content-Type-Options absent

Remediation: Evaluate and configure X-Content-Type-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0014 - Missing HTTP security header: Referrer-Policy

Asset: http://127.0.0.1:8765/robots.txt

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Referrer-Policy. Application-specific impact has not been established.

Evidence:

- /robots.txt: Referrer-Policy absent

Remediation: Evaluate and configure Referrer-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0015 - Missing HTTP security header: Content-Security-Policy

Asset: http://127.0.0.1:8765/admin

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Content-Security-Policy. Application-specific impact has not been established.

Evidence:

- /admin: Content-Security-Policy absent

Remediation: Evaluate and configure Content-Security-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0016 - Missing HTTP security header: X-Frame-Options

Asset: http://127.0.0.1:8765/admin

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Frame-Options. Application-specific impact has not been established.

Evidence:

- /admin: X-Frame-Options absent

Remediation: Evaluate and configure X-Frame-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0017 - Missing HTTP security header: X-Content-Type-Options

Asset: http://127.0.0.1:8765/admin

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain X-Content-Type-Options. Application-specific impact has not been established.

Evidence:

- /admin: X-Content-Type-Options absent

Remediation: Evaluate and configure X-Content-Type-Options where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0018 - Missing HTTP security header: Referrer-Policy

Asset: http://127.0.0.1:8765/admin

Severity: low

Confidence: high

Validation: unconfirmed

Category: security_configuration

CVSS: None

Description: The HTTP response did not contain Referrer-Policy. Application-specific impact has not been established.

Evidence:

- /admin: Referrer-Policy absent

Remediation: Evaluate and configure Referrer-Policy where appropriate.

Source: ThreatFlow Python HTTP Scanner

TF-0001 - Open TCP port 8765

Asset: 127.0.0.1:8765

Severity: informational

Confidence: high

Validation: observed

Category: network_exposure

CVSS: None

Description: TCP connectivity was successful. An open port is not automatically a vulnerability.

Evidence:

- TCP connection succeeded: 127.0.0.1:8765

Remediation: Verify that the exposed service is required and appropriately secured.

Source: Python TCP Socket Scanner

TF-0010 - API documentation publicly reachable

Asset: http://127.0.0.1:8765/docs

Severity: informational

Confidence: high

Validation: observed

Category: information_exposure

CVSS: None

Description: The API documentation endpoint returned HTTP 200. This alone does not establish a vulnerability.

Evidence:

- GET /docs returned HTTP 200

Remediation: Review whether API documentation should be available in the deployment environment.

Source: ThreatFlow Python HTTP Scanner

TF-0019 - Admin route accessible

Asset: http://127.0.0.1:8765/admin

Severity: informational

Confidence: medium

Validation: suspected

Category: access_control

CVSS: None

Description: The admin route returned HTTP 200. Authentication and authorization have not been tested.

Evidence:

- Unauthenticated GET /admin returned HTTP 200

Remediation: Verify authentication and authorization controls.

Source: ThreatFlow Python HTTP Scanner

4. Human Approval and Safety

No active validation approvals were requested.

No active exploitation or intrusive validation was executed.

5. Limitations

- TCP scanner checks registered ports only.

- HTTP scanner performs non-destructive GET requests.

- TLS assessment uses certificate verification.

- No exploit or intrusive validation was performed.

- CVSS scores are not assigned without sufficient evidence.

6. Audit Information

Assessment ID: dfcbc458-116f-49fc-bc6e-3cf2a0846114

Execution status: completed
